Salvo! 1.5 Update

The Salvo 1.5 update provides added functionality and new features, including:

- Version Incremented to 1.5
- Macromedia Crash Fixed
- Damage Adjustment
- Play Fixes
- Added PBEM Function
- Added HotSeat Function
- New HotKeys
- Added Movement Undo Function
  
- Fix: Fog Crash. (Macromedia error message) Scenarios with limited visibility due to fog no longer crash.
- Fix: Inconsistent Anchoring. Anchored ships will now remain anchored provided tha they are set to 'User' control mode.
- Fix: Crew Allocation and Reports. Crew allocation and crew report is now accurate.
- Fix: No gun crews. Zero crew allocated to guns will prevent the vessel from shooting, provided that both the starboard and port batteries have no crew.
- Fix: Range '11' Combat Marker. The range 11 combat marker will not reoccur.
- Fix: Spanish Flag. The Spanish flag graphic has been significantly improved.
- Fix: Exit Buttons Behavior. Incorrect behavior from the main screen exit buttons has been fixed.
- Fix: Damage Adjustment. Damage received is now more likely to cause a fire, and more likely to cause the vessle to explode. For best results, also increase the damage level in settings.
- New: Movement Undo. Pressing the 'U' key will undo the last ship movement.
- New: Attack Flag. The combat messsage for the firing ship now also displays the firing ship's country flag. This provides better recognition of what is going on during combat.
- New: Cancel Button In Battle Report. A cancel button now allows for better viewing of the end of action battle report.
- New: Hotseat Play. Play against your local friends by taking alternate turns on the same computer.
- New: PBEM. Play against opponents anywhere in the world by exchange Salvo! Battle files by email.
- New: 2 New Tutorials. Two new tutorials in Salvo 1.5's 'Help' screen provide information on all new features and also the Battle Generator and Tweaker
